

**Sydney, Australia 8 July 2008**

**For immediate release:**

## **THE SKY'S THE LIMIT FOR JETSTREAM**

*Jetstream* has proved to be a worldwide hit following its launch at MIPTV in April by Beyond Distribution.

As the first collaboration between Beyond and Paperny Films, this 8 x 60 minute HD series has been picked up by a host of international buyers including The History Channel UK, TV2 Norway and TV4 Fakta Sweden and Finland, with other deals closed in France, Poland, Hungary, Slovakia, Bulgaria, Korea and elsewhere.

"*Jetstream* reveals the strong characters and personal stories behind the hard, military exterior of these jet fighter pilots," says Marzenna Czubowicz from Beyond Distribution. "This, coupled with high production values, is the reason this program has been popular with broadcasters".

Rachel Job, The History Channel, said "*Jetstream* appeals to audiences both new and established, combining thrills and spills with genuine emotion as our trainees battle their way through the tough environment. History Channel viewers like extreme situations but they also want fascinating facts and we believe *Jetstream* fits the bill perfectly."

Ole Steen Stolberg, TV4, agrees "From flight simulator to air-to-air combat, *Jetstream* is both entertaining and enlightening and therefore very appropriate for TV4's dedicated documentary channel TV4 Fakta, that airs in Sweden and Finland".

*Jetstream* chronicles the white knuckle trials of an elite group of Air Force pilots struggling to master one of the world's most advanced supersonic tactical fighter jets, the \$35 million F-18 Hornet. Hand picked from thousands, seven men and one woman are poised to join the world's most exclusive fight club. In each thrilling episode these future warriors are followed for nine months through every adrenaline charged mission from ground school to graduation. Few will make the cut.
